PROFESSIONAL SUMMARY

Software Engineer and Full Stack MERN Developer with 2.5+ years of experience delivering production web applications using React.js, Node.js, Express.js, MongoDB, TypeScript, and SQL. Experienced in REST APIs, JWT authentication, RBAC, payment integration, and AWS deployment across ERP, CRM, e-commerce, and booking platforms.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux Toolkit, Bootstrap, Material UI, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, MVC Architecture, CRUD Operations, Cron Jobs

Database: MongoDB, MySQL, Data Modeling

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), Authorization, Input Validation

Real-Time & Payments: Socket.io, WebSockets, Razorpay Integration, Third-Party APIs

Cloud & Deployment: AWS (EC2, S3, Lightsail), Vercel, Nginx, PM2

Tools: Git, GitHub, Postman, VS Code, Antigravity

WORK EXPERIENCE

MERN Stack Developer | Ocean Softwares June 2025 - Present

- Single-handedly delivered **4 production web applications** and supported **5+ additional live projects** across ERP, e-commerce, booking, and donation domains.
- Engineered full-stack solutions with React.js, Node.js, Express.js, MongoDB, and TypeScript, following MVC architecture and reusable component practices.
- Designed REST APIs with CRUD operations, JWT authentication, and role-based access control for multi-role user workflows.
- Created responsive interfaces with Redux Toolkit, including dynamic forms, data tables, and admin dashboards wired to backend services.
- Launched applications on AWS and Vercel, setting up PM2 and Nginx for stable, always-on hosting.
- Translated business requirements into technical solutions, and managed code through Git, GitHub, and Postman API testing.
- Troubleshot live-environment issues, fixed defects, and shipped feature enhancements for client projects.
- Handled requirement analysis, coding, release, and post-launch support from start to finish.

Full Stack Developer | Consortia 22 February 2024 - May 2025

- Maintained a responsive business website with a clean interface for desktop and mobile users.
- Contributed to a Car Sales & Repair Showroom Management System covering customer data, leads, follow-ups, and service records.
- Built an Admin Panel for Psychology Classes to centralize student data, course details, and registrations.

- Connected frontend and backend through REST APIs, with CRUD operations and form validations for accurate data entry.
- Crafted reusable UI components shared across management modules.
- Assisted with debugging, enhancements, and release cycles to keep applications stable.

KEY PROJECTS

Syncraze (syncraze.com) - Construction ERP / CAFM System (Qatar) Ocean Softwares

- Contributed to a Qatar-based Construction ERP and CAFM (Computer-Aided Facility Management) system that manages operations through configurable forms and reports.
- Built a **Custom Form Builder** with dynamic fields, sections, and validations, letting end users create forms without developer help.
- Developed a reporting and dashboard module for custom charts with group-by, drill-down, filtering, and data visualization.
- Automated workflows with Cron jobs for scheduled follow-up emails and Socket.io for real-time approval notifications.
- Linked the React.js interface with Node.js services and MongoDB for form, report, and notification data.
  Tech Stack: MERN Stack, TypeScript, Socket.io, Cron Jobs

Theatre Booking Platform (thetinytheatre.in) Ocean Softwares

- Solely designed and launched a private theatre booking platform covering the customer website, admin panel, and backend.
- Enabled slot booking and snack or add-on ordering, plus online payments and a management console for reservations.
- Wrote server-side logic for booking creation, slot management, and payment processing.
- Maintain the live platform with regular fixes and updates.
  Tech Stack: MERN Stack, REST APIs, Payment Gateway

E-commerce Platform (youwomenswear.com) Ocean Softwares

- Single-handedly built and shipped an online store for a leggings brand with a storefront, admin panel, and backend.
- Provided product browsing and ordering on a responsive storefront, with admin controls for products and orders.
- Created APIs for the product catalog, orders, and store administration.
- Keep the store running smoothly through regular patches and enhancements.
  Tech Stack: MERN Stack, REST APIs

Charity Donation Management Platform (ansuzhulagu.org) Ocean Softwares

- Created a donation management website with an admin dashboard for tracking contributions.
- Added food donation slot booking with secure online payment collection.
- Coded server endpoints for donations, slot scheduling, and payment handling.
  Tech Stack: MERN Stack, Payment Gateway

EDUCATION

Bachelor of Engineering (B.E.) in Mechanical Engineering 2019 - 2023
JP College of Engineering CGPA: 8.1 / 10
